## **SIEMENS**

## **Data sheet**

6GK7242-7KX31-0XE0

## product type designation

## CP 1242-7 V2

Communications processor CP 1242-7 V2 for connection of SIMATIC S7-1200 to GSM/GPRS network; Web server access to CPU, data point configuration, observe national approvals.

| transfer rate   |                           |
|---|---------------------------|
| transfer rate   |                           |
| <ul> <li>for GPRS transmission</li> </ul>               |                           |
| — with downlink / maximum                               | 86 kbit/s                 |
| — with uplink / maximum                                 | 43 kbit/s                 |
| interfaces  |                           |
| number of interfaces / according to Industrial Ethernet | 0                         |
| number of electrical connections                        |                           |
| <ul><li>for external antenna(s)</li></ul>               | 1                         |
| <ul><li>for power supply</li></ul>                      | 1                         |
| number of slots   |                           |
| for SIM cards   | 1                         |
| type of electrical connection                           |                           |
| <ul><li>for external antenna(s)</li></ul>               | SMA socket (50 ohms)      |
| for power supply  | 3-pole terminal block     |
| slot version  |                           |
| • for SIM card  | Standard                  |
| wireless technology                                     |                           |
| type of mobile wireless service                         |                           |
| <ul><li>is supported / SMS</li></ul>                    | Yes                       |
| <ul><li>is supported / GPRS</li></ul>                   | Yes                       |
| • note  | GPRS (Multislot Class 10) |
| type of wireless network / is supported                 |                           |
| • GSM   | Yes                       |
| • UMTS  | No                        |
| ● LTE   | No                        |
| operating frequency                                     |                           |
| ● 850 MHz   | Yes                       |
| • 900 MHz   | Yes                       |
| • 1800 MHz  | Yes                       |
| ● 1900 MHz  | Yes                       |
| transmit power  |                           |
| <ul> <li>at operating frequency 900 MHz</li> </ul>      | 2 W                       |
| <ul> <li>at operating frequency 1800 MHz</li> </ul>     | 1 W                       |
| at operating frequency 1900 MHz                         | 1 W                       |
| supply voltage, current consumption, power loss         |                           |
| type of voltage / of the supply voltage                 | DC                        |
| supply voltage / external                               | 24 V                      |

|  | 041/   |
|--|--|
| supply voltage / external / at DC / rated value  | 24 V   |
| relative positive tolerance / at DC / at 24 V  | 20 %   |
| relative negative tolerance / at DC / at 24 V  | 20 %   |
| consumed current  • from external supply voltage / at DC / at 24 V / typical   | 0.1 A  |
| from external supply voltage / at DC / at 24 V / maximum   | 0.22 A   |
| power loss [W]   | 2.4 W  |
| ambient conditions   |  |
| ambient temperature  |  |
| for vertical installation / during operation   | -20 +60 °C   |
| for horizontally arranged busbars / during operation   | -20 +70 °C   |
| during storage   | -40 +70 °C   |
| during transport   | -40 +70 °C   |
| relative humidity  |  |
| at 25 °C / without condensation / during operation / maximum   | 95 %   |
| protection class IP  | IP20   |
| design, dimensions and weights   |  |
| module format  | Compact module S7-1200 single width  |
| width  | 30 mm  |
| height   | 100 mm   |
| depth  | 75 mm  |
| net weight   | 0.133 kg   |
| fastening method   |  |
| <ul> <li>35 mm top hat DIN rail mounting</li> </ul>  | Yes  |
| S7-300 rail mounting   | No   |
| wall mounting  | Yes  |
| product features, product functions, product components  | / general  |
| number of units  |  |
| ODLI /'  |  |
| per CPU / maximum  | 3  |
| per CPU / maximum  performance data  | 3  |
| performance data  number of users/telephone numbers / definable / maximum  | 10   |
| performance data number of users/telephone numbers / definable /   |  |
| performance data  number of users/telephone numbers / definable / maximum  |  |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  |  |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  | 10   |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  | 10   |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  | 10   |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections   | 10 like CPU  |
| performance data number of users/telephone numbers / definable / maximum  performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum  performance data / IT functions  number of possible connections • as email client / maximum  performance data / telecontrol control center connection  | 10 like CPU  |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection   | 10  like CPU  1  Telecontrol Server Basic supported  |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection   | 10  like CPU  1  Telecontrol Server Basic supported supported  |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note   | 10  like CPU  1  Telecontrol Server Basic supported  |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  | 10  like CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface                             |
| performance data number of users/telephone numbers / definable / maximum  performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum  performance data / IT functions  number of possible connections • as email client / maximum  performance data / telecontrol  control center connection • by means of a permanent connection • by means of demand-oriented connection • note  protocol / is supported • DNP3  | 10  like CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No                         |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5   | 10  like CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No                      |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5  product function / data buffering if connection is aborted   | 10  like CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No                         |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5  product function / data buffering if connection / with Telecontrol Server Basic  | 10  Iike CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No Yes; 64,000 events   |
| performance data  number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5  product function / data buffering if connection is aborted  number of stations / for direct communication / with  Telecontrol Server Basic  • in send direction / maximum  | 10  Iike CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No Yes; 64,000 events   |
| performance data number of users/telephone numbers / definable / maximum  performance data / open communication number of possible connections / for open communication • by means of T blocks / maximum  performance data / IT functions  number of possible connections • as email client / maximum  performance data / telecontrol  control center connection • by means of a permanent connection • by means of demand-oriented connection • note  protocol / is supported • DNP3 • IEC 60870-5  product function / data buffering if connection is aborted  number of stations / for direct communication / with Telecontrol Server Basic • in send direction / maximum • in receive direction / maximum  | 10  Iike CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No Yes; 64,000 events   |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5  product function / data buffering if connection is aborted  number of stations / for direct communication / with Telecontrol Server Basic  • in send direction / maximum  • in receive direction / maximum  performance data / teleservice   | Iike CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No Yes; 64,000 events  3 15 |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5  product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic  • in send direction / maximum  • in receive direction / maximum  performance data / teleservice  diagnostics function / online diagnostics with SIMATIC STEP 7   | 10  Iike CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No Yes; 64,000 events   |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5  product function / data buffering if connection is aborted  number of stations / for direct communication / with Telecontrol Server Basic  • in send direction / maximum  • in receive direction / maximum  performance data / teleservice  diagnostics function / online diagnostics with SIMATIC  STEP 7  product function | like CPU  1 Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No Yes; 64,000 events  3 15  |
| number of users/telephone numbers / definable / maximum  performance data / open communication  number of possible connections / for open communication  • by means of T blocks / maximum  performance data / IT functions  number of possible connections  • as email client / maximum  performance data / telecontrol  control center connection  • by means of a permanent connection  • by means of demand-oriented connection  • note  protocol / is supported  • DNP3  • IEC 60870-5  product function / data buffering if connection is aborted number of stations / for direct communication / with Telecontrol Server Basic  • in send direction / maximum  • in receive direction / maximum  performance data / teleservice  diagnostics function / online diagnostics with SIMATIC STEP 7   | Iike CPU  1  Telecontrol Server Basic supported supported Connection to SCADA system using OPC interface  No No Yes; 64,000 events  3 15 |

| security information   |   |  |
| security information   | Siemens provides products and solutions with industrial security functions that support the secure operation of plants, solutions, machines, equipment and/or networks. They are important components in a holistic industrial security concept. With this in mind, Siemens' products and solutions undergo continuous development. Siemens recommends strongly that you regularly check for product updates. For the secure operation of Siemens products and solutions, it is necessary to take suitable preventive action(e.g. cell protection concept) and integrate each component into a holistic, state-of-the-art industrial security concept. Third-party products that may be in use should also be considered. For more information about industrial security, visit http://www.siemens.com/industrialsecurity. To stay informed about product updates as they occur, sign up for a product-specific newsletter. For more information, visit http://support.automation.siemens.com. (V3.4) |  |
